Overview

Food and Drug Administration – Approved Indications

Siliq (brodalumab) is an interleukin-17 receptor A antagonist indicated for:

Disease State	
Plaque psoriasis	X

Clinical Guideline Coverage Criteria

The plan may authorize coverage of **Siliq** for Members when **ALL** of the following criteria are met:

Initial Authorization Criteria

1. Documented diagnosis of moderate to severe plaque psoriasis

AND

2. Documentation of **one (1)** of the following:
   a. Greater than or equal to 3% body surface area involvement
   b. Severe scalp psoriasis
   c. Palmoplantar, facial, or genital involvement

AND

3. Patient is at least 18 years of age or older

AND

4. Prescribed by a dermatologist

AND

5. Documentation of failure to a minimum three (3) month supply of at least **one (1)** of the following traditional systemic agents, unless contraindicated or clinically significant adverse effects are experienced: methotrexate, cyclosporine, acitretin, or phototherapy (*Note: document drug, date and duration of trial)*

AND

6. Documentation of history of failure to **two (2)** of the listed medications from each of the following therapeutic categories (only one medication is required if only one is available for a listed therapeutic category), unless contraindicated *(Note: document drug, date and duration of trial)*:
   a. Interleukin Antagonists: Bimzelx, Skyrizi, Taltz, Tremfya, or Yesintek or Starjemza
   b. Phosphodiesterase 4 inhibitors: Otezla
   c. Tumor Necrosis Factors: Cimzia, Enbrel, Simlandi

AND

7. Documentation the patient is not receiving the requested medication in combination with another biologic drug or with a targeted synthetic oral small molecule drug

Reauthorization Criteria

1. Documentation the patient has been receiving the requested medication for at least six (6) months

AND

2. Documented diagnosis of moderately to severe plaque psoriasis

AND

3. Patient is at least 18 years of age or older

AND

4. Prescribed by a dermatologist

AND

5. Submission of medical charts documenting the patient experienced a beneficial clinical response defined as reduction in body surface area affected by plaque psoriasis from baseline

AND

6. Submission of medical charts documenting that compared to baseline, the patient has experienced an improvement in at least one symptom of plaque psoriasis such as itching, redness, flaking, scaling, burning, cracking, or pain

AND

7. Documentation the patient is not receiving the requested medication in combination with another biologic drug or with a targeted synthetic oral small molecule drug

Limitations

- Members who have already initiated the requested medication using samples, free goods, similar offerings, or self-paying for the medication directly do not qualify for an established clinical response and should be reviewed against initial approval criteria.
- Initial approval will be authorized for six (6) months. Reauthorization will be provided in 12-month intervals.
- A Member who has received less than six (6) months of therapy or who is restarting therapy with the requested drug is reviewed under Initial Authorization Criteria.
- Members new to the plan stable on the requested medication should be reviewed against Initial Authorization Criteria.

Codes

None

Approval And Revision History

June 10, 2025: Reviewed by the Pharmacy & Therapeutics Committee (eff 9/1/25).

- October 14, 2025: Initial approvals limited to 6 months with annual reauthorization coverage criteria added. Provider requirements no longer allow with in consultation with the specialist. Added coverage criteria to prevent duplicative targeted immunomodulator therapy. Added disease severity requirements and non-biologic prerequisites. Updated biologic prerequisite language (no change in prerequisites). Updated age requirements to adults. (eff 1/1/26).
- December 9, 2025: Replaced Humira with Simlandi as Simlandi is the preferred adalimumab product (eff 3/1/26).
- June 9, 2026: Added Starjemza as a prerequisite for plaque psoriasis to support the updated ustekinumab strategy – Yesintek and Starjemza are the preferred ustekinumab products. Administrative update to the limitation statement to include members initiated on the requested medication by self-paying for the medication directly do not qualify for established clinical response and should be reviewed against initial approval criteria. Administrative update to remove CareLink from Medical Necessity Guideline template. (eff 7/1/26).

Background, Product and Disclaimer Information

Pharmacy Medical Necessity Guidelines have been developed for determining coverage for plan benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. The plan makes coverage decisions on a case-by-case basis considering the individual member's health care needs. Pharmacy Medical Necessity Guidelines are developed for selected therapeutic classes or drugs found to be safe, but proven to be effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. The plan revises and updates Pharmacy Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

For self-insured plans, coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a Pharmacy Medical Necessity Guideline and a self-insured Member's benefit document, the provisions of the benefit document will govern.

Treating providers are solely responsible for the medical advice and treatment of members. The use of this policy is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to member eligibility and benefits on the date of service, coordination of benefits, referral/authorization and utilization management guidelines when applicable, and adherence to plan policies and procedures and claims editing logic.
